# GROVE GHC75

The mid-range GHC75 delivers powerful agility and boom length of 11 m – 36 m (36 ft – 118 ft 1 in).

## Features

### > Maximum comfort

The recently updated operators cab of the GHC75 is longer, providing additional storage. It also includes optimized armrest controls for improved operator ergonomics and precise operation, USB ports, and radio with Bluetooth connection. The standard rated capacity limiter now provides the operator with additional inputs for setting function ramps and speeds. Also included is a color monitor for up to four exterior mounted cameras, 200 of cab tilt, and integrated LED work lights on the front of the cab for excellent jobsite visibility.

### > Strong telescopic boom

The GHC75 comes equipped with a robust full-power four-section boom that allows for telescoping under load. The main boom offers 11 m – 36 m (36 ft – 118 ft 1 in) of reach. This paired with the standard 8 m (26 ft 3 in) offsettable swingaway extension provides a max tip height of 46 m (151 ft).

### > Travel made easy

Transportation to the jobsite can easily be accomplished in one to two loads. Set up time has been reduced as carbody counterweights are not required. The upper counterweight is hydraulically installed via the quick self-assembly system. When set up the strong undercarriage provides 100 percent pick and carry capability and work up to 40 of inclination. The hydraulically extendable tracks allow for maximum flexibility on the jobsite.

+Refer to rating plate for actual weight

When lifting over swingaway and/or jib combinations, deduct total weight of all load handling devices reeved over main boom nose directly from swingaway or jib capacity.

**NOTE:** All load handling devices and boom attachments are considered part of the load and suitable allowances MUST BE MADE for their combined weights. Weights are for Grove furnished equipment.
